Resume updated: Aug, 01 2011

General:

- Over 8 years experience in development, programming with PHP/MySQL/HTML/CSS/JavaScript (Prototype)/Apache/Linux.
- Considerable Ecommerce development experience (First developed my own ecommerce engine while working for Infocreek Co., and then Magento)
- At least three and a half years experience developing using the Magento Ecommerce platform (community versions 1.1.8, 1.3.x, 1.4.x; Enterprise edition experience preferred v. 1.6.x - 1.10.x).
- Extensive experience in Magento customization, modules development, integration, web services and performance optimizations such as memcached. Much of the work involving installs to a vast array of system architectures..
- Magento integrations with services such as: Zendesk, SmartTurn, LinkPoint, CoreMetrics, IRIS, DocData Payment, ABC Mail, Mail Chimp, GeoIP
- Strong experience in upgrading Magento based projects to new versions as well as upgrading from the community to Enterprise edition.
- Project management handling experience (Twice as team leader in an organization: Infocreek Co. and WebmasterInternational Inc.)
- Good knowledge of hosting management and solving server side issues like Load Balance. F the last 7 years I have used Unix / Linux for my local development server, configuring it myself, with working knowledge of Linux via command line)
- Good understanding of MVC Frameworks. Symfony and Zend Framework are preferred.
- Experience using version control such as SVN and CVS.

Based on the Magento (Magento inc / Varien inc.)

1. <http://www.westsidewholesale.com/>
2. <http://shop.zend.com/>
3. <http://conns.com/>
4. <http://eastwood.com/>
5. <http://grasscity.com/>
6. other not full-time projects, magento support tasks, professional service team member.

Professional Background

- **Started** with the Infocreek Company, the best project being; <http://www.templatetuning.com/>. **Then** I moved onto WebmastersInternational, one of the interesting projects that involved me acting as team lead, being; <http://www.photoartmuseum.com/>. **Now** – Varien inc. (main product being **Magento** eCommerce software) where my main task is to create new projects based on the Magento Platform and the lintegration of lots of services with. Many projects involve moving from the 1.1.x to 1.3.x, then 1.4.x, 1.6.x – 1.9.x versions.
- Good knowledge of web development processes and technologies, including OOP, patterns, DataBase normalization and query optimization etc..
- Some Linux/Unix system administrator experience. Many integration practices (Payment, Shipment, Billing, Stock, Mailing and other systems). Lots of them with Magento (magentocommerce.com) .
- Experience of Unix programming C/C++ (console and GUI with QT) Ex: The musical automatic device based on Kubuntu OS and QT lib (2007).
 - o Experience of Java programming in 2005 - cross platform desktop software with client server structure via CORBA. Writing with SWING library for our seal managers.
- Languages: English, Russian, Ukrainian (native).

Skills:

Languages

PHP 4-5 (OOP, MVC etc)	8+ years
JavaScript (Prototype)	8+ years
HTML	8+ years
MySQL (Normalisation, optimisation etc)	8+ years
PostgreSQL (several projects)	1 year
CSS	8+ years
AJAX	6+ years
DOM, XML/XSLT	8+ years
C/C++ (QT) / VisualC++ (MFC, win32 API) / C#	2+ years
Java (SWING, CORBA)	6 month

Servers etc

CVS, SVN

IIS, Apache

OS

Windows (advanced user 9x, NT, XP, Win 7)

FreeBSD (user)

Linux (advanced user)

Software integration (using)

Magento, phpBB, phpChat, webCalendar, ocCommerce, ZendCart, vBulletin, Mambo, phpNuke, Joomla

Magento integrated with:

Zendesk, SmartTurn, LinkPoint, CoreMetrics, IRIS, DocData Payment, ABC Mail, Mail Chimp, GeoIP

Frameworks

Smarty (template engine), Symfony (framework)

Known software

Corel Draw, Adobe Photoshop, Maya 3D, Gimp, Power Designer, Dia (UML), Vim.

EDITING: Zend Studio for Eclipse, Vim/Gvim, Quanta+;
